

WaterPoint LNC

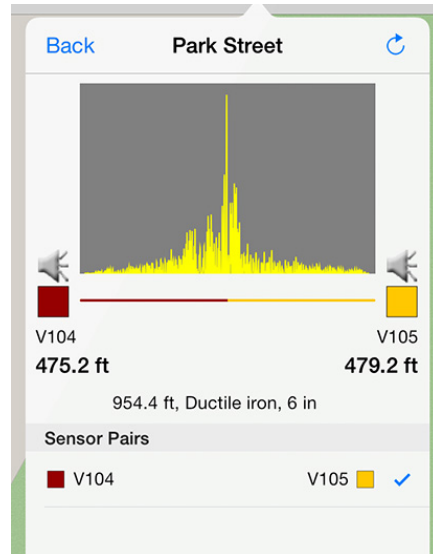

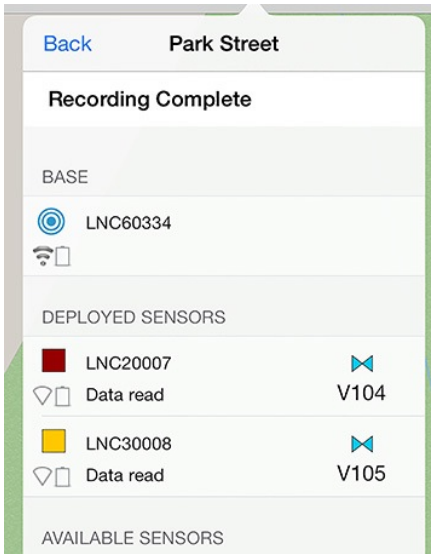

Pinpoint Pipeline Leaks on Your iPad

WaterPoint Leak Noise Correlator (LNC) combines asset management and water conservation into one easy to use iPad App.

- Pinpoint leaks
- Map pipes & other assets
- Save to WPN Cloud Server
- Share with other users and 64seconds

LNC

Deploy > Pinpoint > Cloud

Deploy

LNC Sensors are placed on the iPad map and physically on the pipe network, usually at hydrants or valves. LNC Sensors communicate wirelessly with the iPad.

Pinpoint

Leaks are pinpointed using the map information and advanced signal processing. Leak location(s) are shown by color-coding pipes on the map.

WPN Cloud Server

LNC data is reviewed on the iPad and shared with other users via the WPN Cloud Server. 64seconds is your virtual consultant.

In the Box:

- 2-4 LNC Sensors
- LNC Base, manages communication
- LNC Dock, recharges sensors
- LNC Stage, for direct asphalt recording
- Protective and eyebolt sensor caps
- Power supply
